

Hi-Tac Clamp

The most versatile piece of straightening equipment on the market...

Today's collision repair industry constantly demands increased vehicle throughput, maximized productivity and increased quality.

this unique **NEW** tool replaces most pulling clamps

Meeting these demands usually means a huge investment in equipment and training.

The Hi-Tac Clamp can achieve all this at minimal cost and with no additional training.

The Hi-Tac Clamp;

- eliminates the need to remove trim/dash panels or upholstery
- eliminates any additional chain damage—pulling chains do not need to contact the vehicle
- replaces over 49 other pulling clamps
- integrates into any existing pulling system, and most anchoring systems
- fits any make & model of vehicle
- facilitates pulling in any direction
- is ITS tested and certified in excess of 5 ton pulling capacity
- takes up no floor space

What more can we say other than... you'll be amazed by how much this small piece of equipment will add to your bottom line!
Just look at the possibilities and use your imagination.
